Landscape Subwoofer

## Hardscape Sub

A U D I O

Luxury Outdoor Sound is what TruAudio does best, and we continue to expand this series with our new Hardscape Subwoofer. It is the perfect option to add the deeper, rich, low end bass to your outdoor entertainment area when an underground subwoofer is not an option. Regardless of terrain, our new 12" Hardscape sub was designed to withstand exterior elements. Its compact and versatile form allows you to place it in cabinets, patio areas, or hidden in your yard's landscape. The Hardscape Sub complements our Acoustiscape landscape packages and the 70v tap setting allows for easy install, no matter how large or small of your outdoor area.
