### Datasheet

# 250 meters Long–Range PoE Switch for CCTV

WI-PS205 | WI-PS210 | WI-PS210G | WI-PS518G WI-PS526G Hardware Version 4.0

#### Overview

Complied with 802.3af/at/bt(Hi-PoE), Wi-Tek Long-Distance PoE Switch provide 4/8/16/24 10/100Mbps PoE RJ-45 ports, which can meet flexibly the demand of different PoE Input in different application scenarios. In addition, Wi-Tek Long-Distance PoE Switch can extend the data transmission distance to 250m, breaking the distance limit and improving the device availability. At the same time, Wi-Tek Long-Distance PoE Switch provide valuable features such as extend mode, PoE Watchdog, Port isolation, creating reliable network to grow your business.

### **Features**

#### PoE 250m Long Distance to Extend Network

DIP switch provides Extend Mode. All PoE ports can transmit data and power up to 250 meters. No additional hardware or configuration is required, making it user-friendly and cost-effective. Perfect for surveillance camera deployment in large areas.

#### Hi-PoE 60W Design for Higher Power PoE Devices

Hi-PoE switch is the upgraded version of PoE switch with higher PoE power. There are many emerging applications that take advantage of high-power PoE, such as building infrastructure with LED display, PTZ IP cameras, and other high power consumption devices.

#### Smart PoE Watchdog to Reboot Camera Automatically

Watchdog is able to monitor status of camera in real-time. Once the camera stops working and does not respond to the switch, the switch will reboot the camera, making surveillance management easier.

#### **CCTV Mode Provide QoS Function**

To ensure your network operates stably at peak performance, QoS is designed to assign priority to critical data on your network. To make it even easier, Wi–Tek's unmanaged switches include a DIP switch that can enable QoS with a simple switch flip.

#### Port Isolation to Prevent Broadcast Storm

With VLAN Mode, all PoE ports only can communicate with uplink ports. Avoid data leakage between each port and prevent broadcast storm from disabling network.
