## Display Speakers and Soundbars

display series

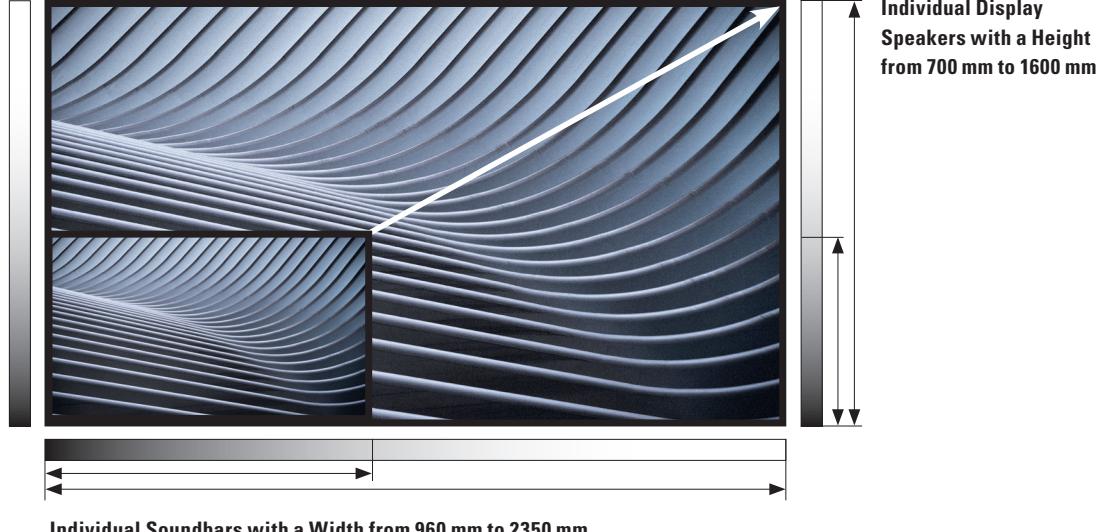

display<sup>•CAM</sup> series

feiner hören 

### **Customized Versions with Made-to-Measure Dimensions**

We manufacture special versions of our display speakers and soundbars tailored to the specific dimensions of individual display models. The display and speakers harmonize perfectly to create uniform visual units.

# Important Safety Information

---

## CAUTION!

Service and repair work must only be carried out by qualified personnel. Do not open the case as there is a risk of electric shock. There are no controls or components inside the device that require you to open the case. If the case has to be opened by qualified personnel, make sure that the device is completely disconnected from the power supply.

The operating voltage must match the local power supply.

The device should be shielded from moisture and wet conditions. It must not be operated in rain or close to water, baths, washbasins, sinks, swimming pools or in damp environments. Do not place any objects filled with water such as vases, glasses or bottles on the device.

Avoid direct sunlight and do not install it in the direct vicinity of radiators or other heat sources. Upon sudden change of climatic conditions (e.g. transfer from a cold place to a warm room) water may condense inside the device, which may lead to malfunction or damage. Before switch-on wait until the amplifiers have reached room temperature.

Unplug the mains plug to protect the device during a thunderstorm or if it is going to be left unsupervised or unused for a longer period of time. This prevents the device being damaged by lightning strikes or voltage surges in the mains grid. Do not touch the case when the device is in use as it may heat up during operation. Make sure that the device is ventilated sufficiently.

## **Improper use will invalidate the warranty!**

### Disclaimer

Ib is not liable for damage to speakers or other equipment caused by negligence or in cases where the product has been used for something other than its intended purpose. In particular, Ib is not liable for lost earnings or other financial losses incurred by the purchaser. This limitation also applies to the personal liability of employees, representatives and agents.

These products meet the requirements of European Directive 2002/96/EC (WEEE) and 2002/95/EC (RoHS).

## 2. Connection with DL-A-/SB-A-Speaker Systems to Displays or Players

### 1. Connecting audio cables

- Connect the line out or the headphone output of the display or other device to the line-in cinch input on the active speaker's connecting terminal. (If the display only has one digital audio output, the signal must first be converted.)
- Connect the passive speaker (right) to the four-pole speaker terminal on the connecting terminal. On model DL-A 2.0, the speaker cable is already attached to the passive speaker. On model DL-A 2.2, connect the active and passive speakers to the four-pole speaker cable provided (four-pole connectors on both sides).

### 2. Connecting the power supply

- Turn the volume control for the active speaker all the way to the left (volume 0).
- Insert the mains adapter provided into the green power supply terminal on the active speaker and connect to the mains grid using the cold device cable.

### 3. Starting up the speaker system

- Switch on the display or other device and set the output volume of the audio output to approximately 60-70 percent.
- The speakers feature an automatic switch-on function and automatically activate when an audio signal is detected at the input. When this happens, the LED in the terminal panel lights up green.
- Turn the volume controller on the connecting terminal up to the desired operating volume.

### 4. Grounding the speakers (ground lift switch)

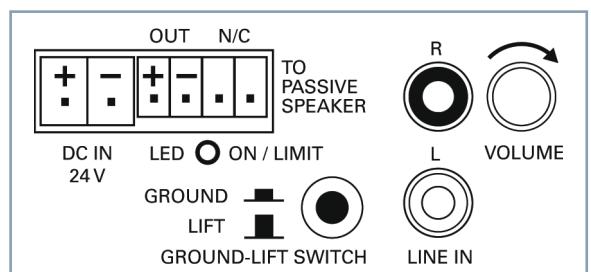

- Depending on the grounding used for the display and other connected components (e.g. PC and crossover switches), the speakers may or may not have to be grounded. The ground lift switch is designed to do this. If the other devices are grounded, the speakers should not be grounded (ground lift). If the devices are not grounded, the speakers should be grounded (ground). Incorrect grounding will result in buzzing sounds and interference.

### 5. Automatic switch-on function

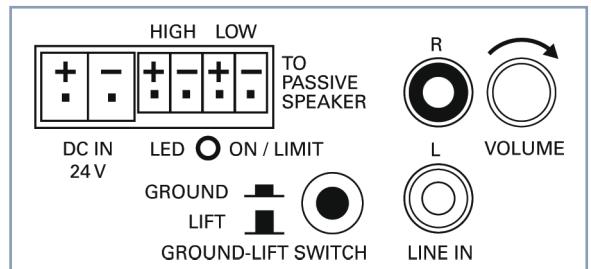

- If the speakers do not receive a signal for more than ten minutes, they automatically switch to standby. The LED in the terminal panel goes out.

### 3. Displaylautsprecher

#### 3.1. DL-A 2.0 Active Stereo Display Speaker Pair with integrated DSP

##### Key Features

- Active stereo speaker pair with DSP
- Very linear frequency range
- Optimized speech intelligibility
- 2 × 50 watts power capacity
- Automatic switch-on
- Switchable Ground-Lift
- Customized versions with height on measure for display heights from 600 up to 1600 mm
- VESA mounts for display widths up to 2400 mm

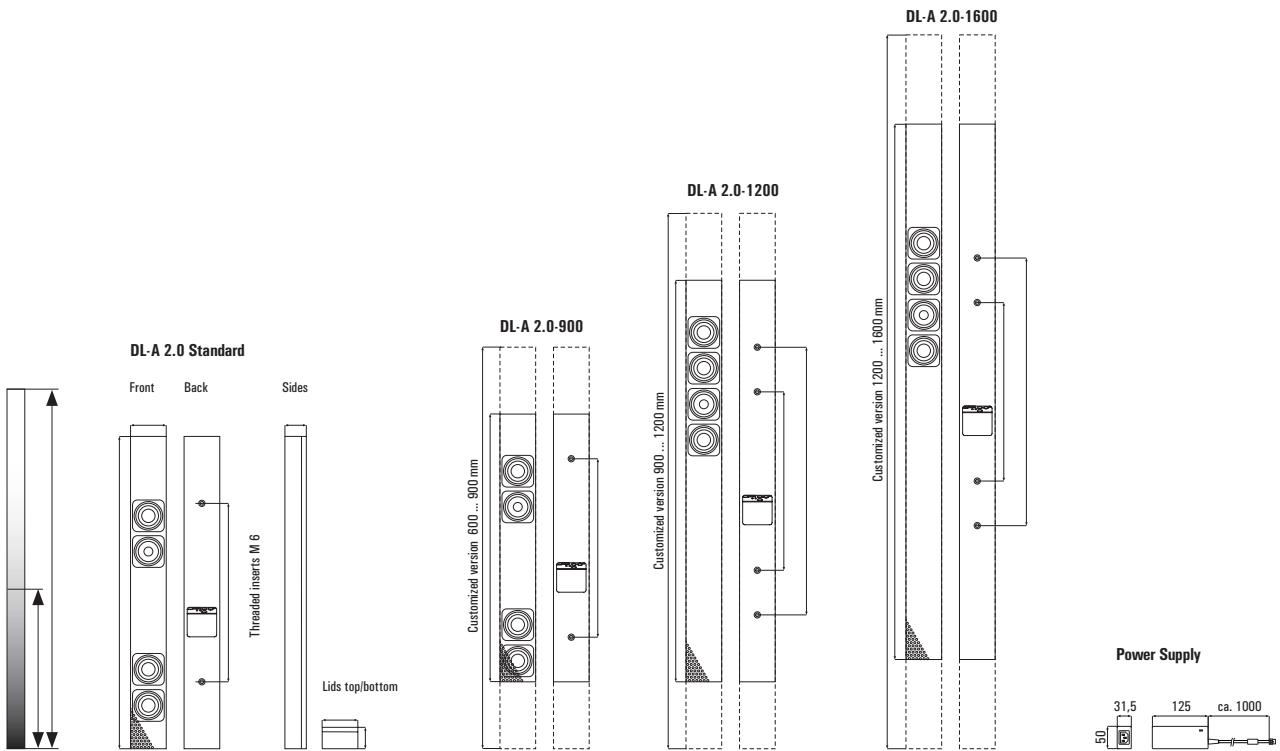

**display** series

##### Technical Data

Principle	Active stereo speaker pair with class-D amplifiers and DSP. Left speaker with amplifier module, right speaker passive.
Components	2 × 2.5" full-range drivers + 2 × 2.5" woofers + 4 × 2.5" passive radiators
Frequency range	55 Hz – 20 kHz
Amplifier output	2 × 50 watts
Sensitivity	max. 109 dB (1W/1m)
Nominal dispersion	120°
Connector Active speaker	Input cinch stereo, pluggable system terminals to connect passive speaker and extern power supply, input cable mini jack 3.5 mm to cinch, 1.5 m;
Connector Passive speaker	Connecting cable with plug
Input sensitivity	-6 dBu for full modulation, input-impedance 10 kohms
Operational controls	Volume control, LED ON/Clip
Automatic switch-on	Switches into an idle state (SLEEP) automatically when the input signal is absent for over 5 min.
Power supply	Extern power supply 24 VDC, 40 VA
Mains connection	90 – 240 VAC
Dimensions (W × H × D)	80 × 700 × 48 mm (per speaker)
Weight	6 kg (pair)
Material	Cabinet aluminium, front precision steel grille, powder-coated, black
Fastening points	Threaded inserts 2 × M 6 at rear (per speaker)
Warranty	5 years

## 4. Mounts for Display Speakers

---

### 4.1. DL-VESA Technical Data

The DL-VESA mounts are designed to fix our display speakers of DL series on displays with VESA-points at rear. The mounts are adjustable for different display widths and heights.

#### Models

---

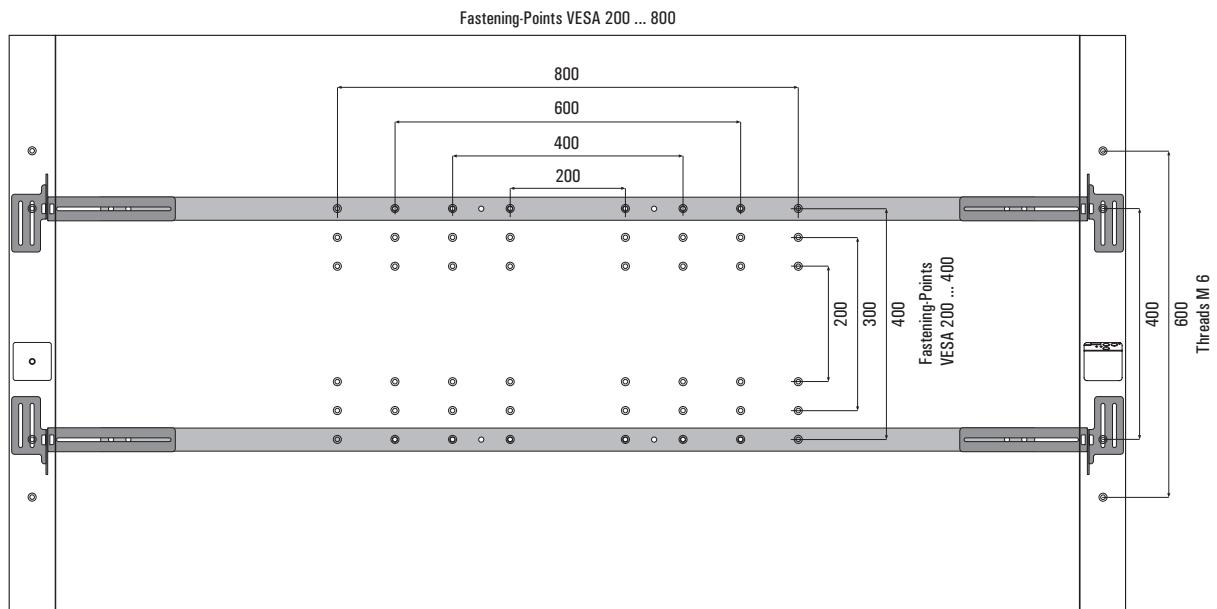

<b>DL-VESA 1400</b>	1150 – 1400 mm
<b>DL-VESA 1650</b>	1400 – 1650 mm
<b>DL-VESA 1900</b>	1650 – 1900 mm
<b>DL-VESA 2150</b>	1900 – 2150 mm
<b>DL-VESA 2400</b>	2150 – 2400 mm

Back view: display with fixed display speakers on DL-VESA.

#### DL-VESA Display-Fastening-Points

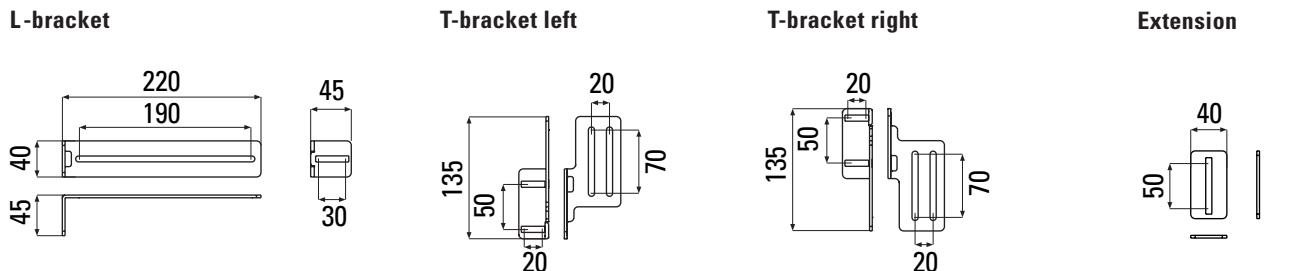

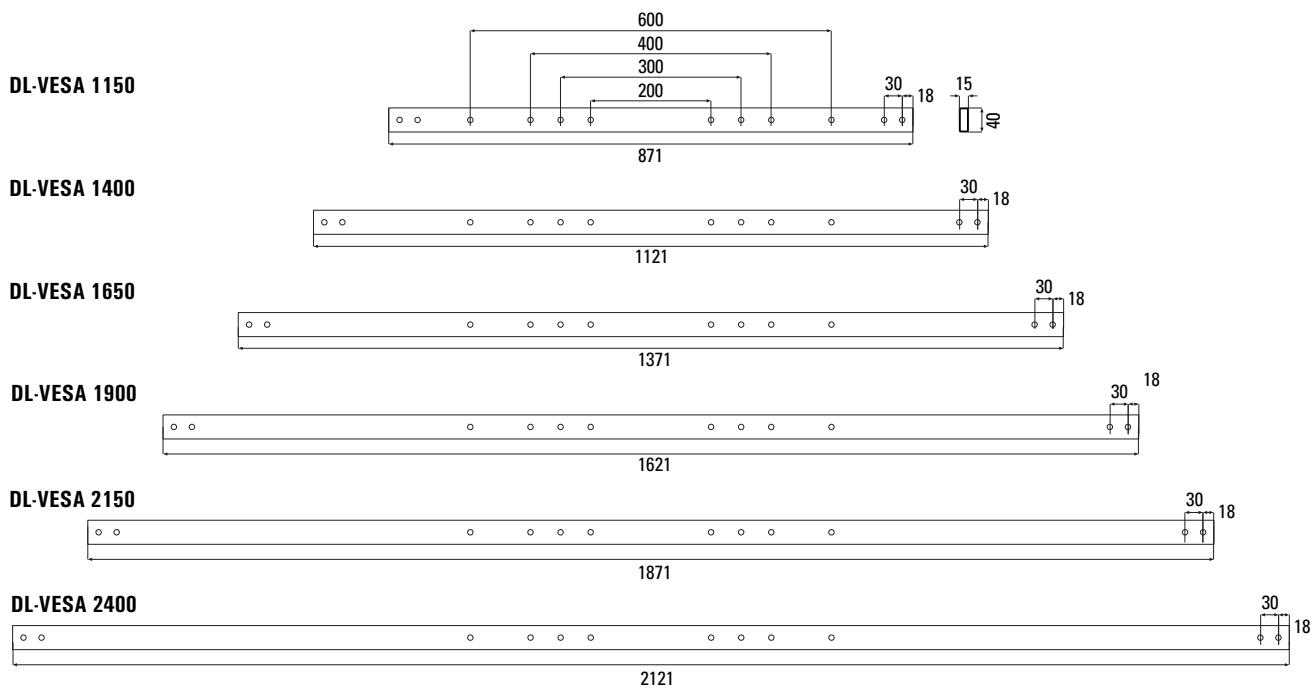

---

The mounts are suitable for all standard VESA-points.

## Dimensions

---

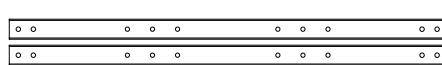

## Parts of DL-VESA Mount

---

The parts of the DL-VESA mounts can be used different, depending on dimensions of display and speaker model (see page 12 – 15)

**2 × Carrier**

**4 × L-bracket**

**2 × T-bracket left**

**2 × T-bracket right**

**4 × Extension**

**12 × Hexagon screw M 6 × 16**

**8 × Carriage screw M 6 × 16**

**8 × Nut M 6**

**20 × Belleville washer M 6**

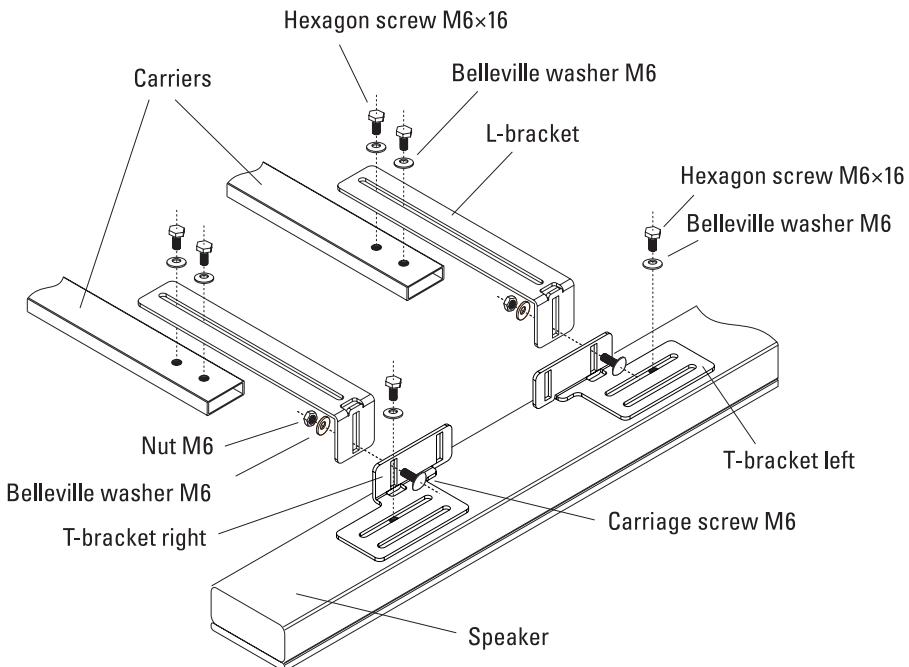

## 4.2. DL-VESA Assembly with DL-A 2.0

### Variante A

For 200–400 mm VESA standard mounts.

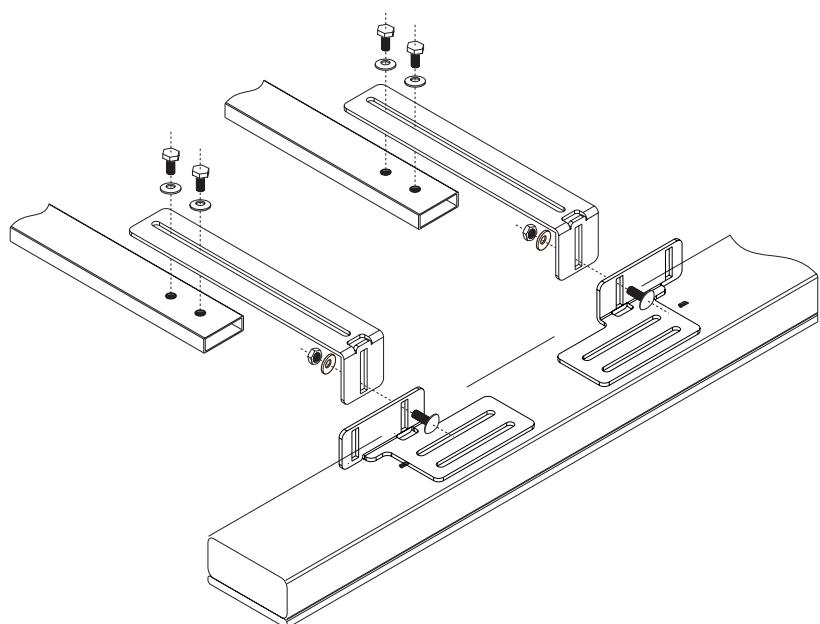

Attach the T-shaped brackets directly to the L-shaped brackets; position the T-brackets symmetrically, with the baseplates facing outwards. The L-shaped brackets can be attached forwards or backwards depending on the depth.

### Variante B

For 400–600 mm VESA standard mounts.

Attach the T-brackets directly to the L-brackets; position the T-brackets symmetrically, with the baseplates facing inwards.

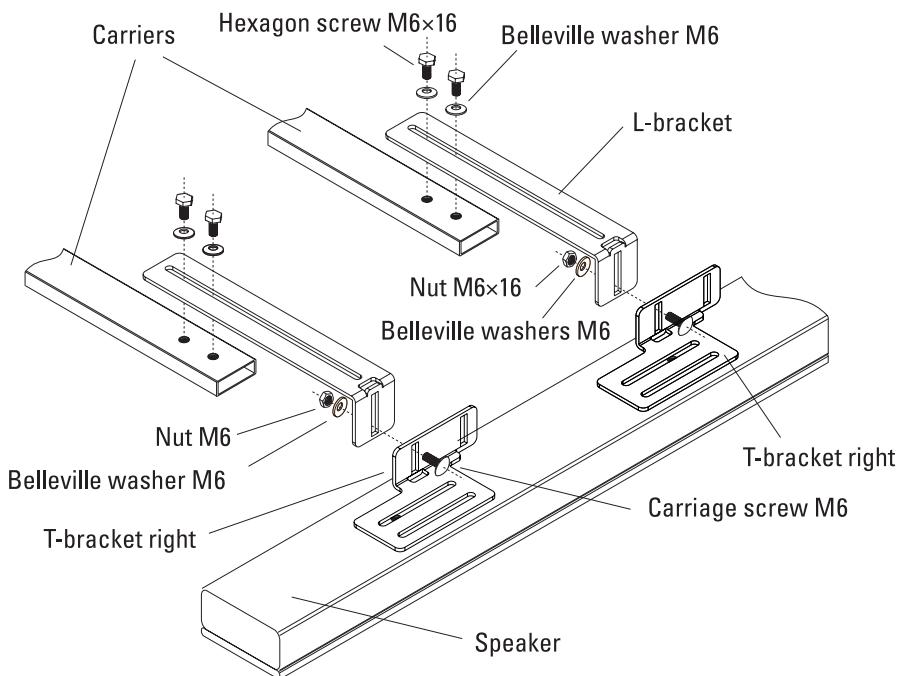

## 4.2. DL-VESA Assembly with DL-A 2.0

---

### Variante C

For asymmetrical VESA standard mounts.

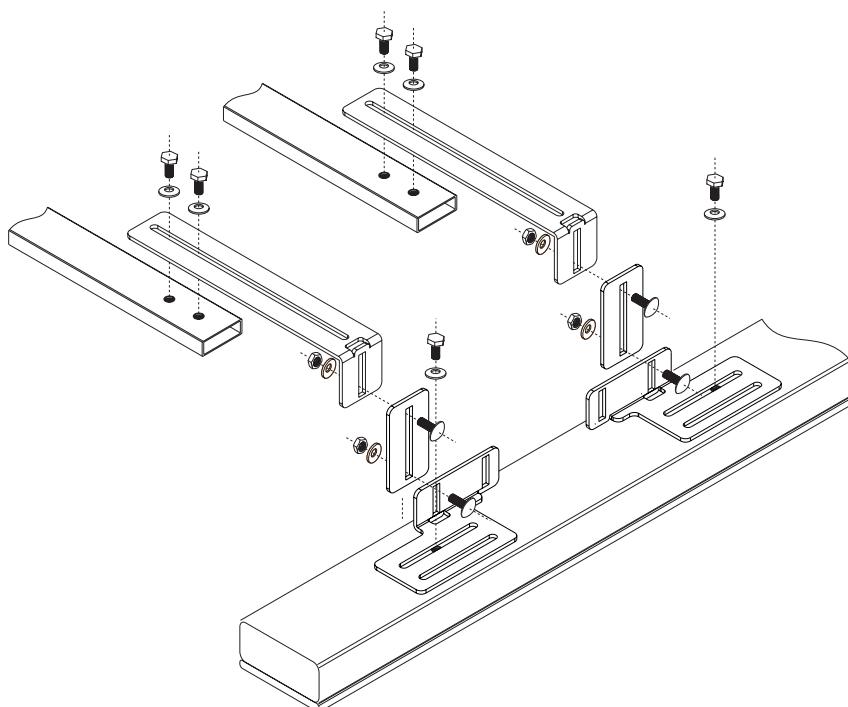

Attach the T-brackets directly to the L-brackets; use two identical T-brackets on each side. The L-brackets can be mounted on the front or back of the T-bracket depending on the depth of the display.

### Variante D

For very deep displays.

Use extension plates between the T-brackets and the L-brackets to add extra space.

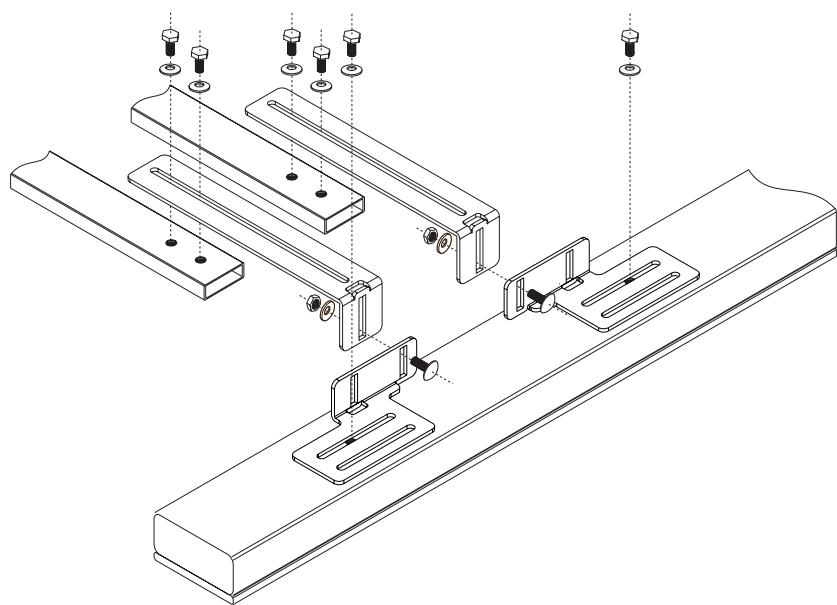

## 4.2. DL-VESA Assembly with DL-A 2.0

---

### Variante E

For VESA standard mounts under 200 mm.

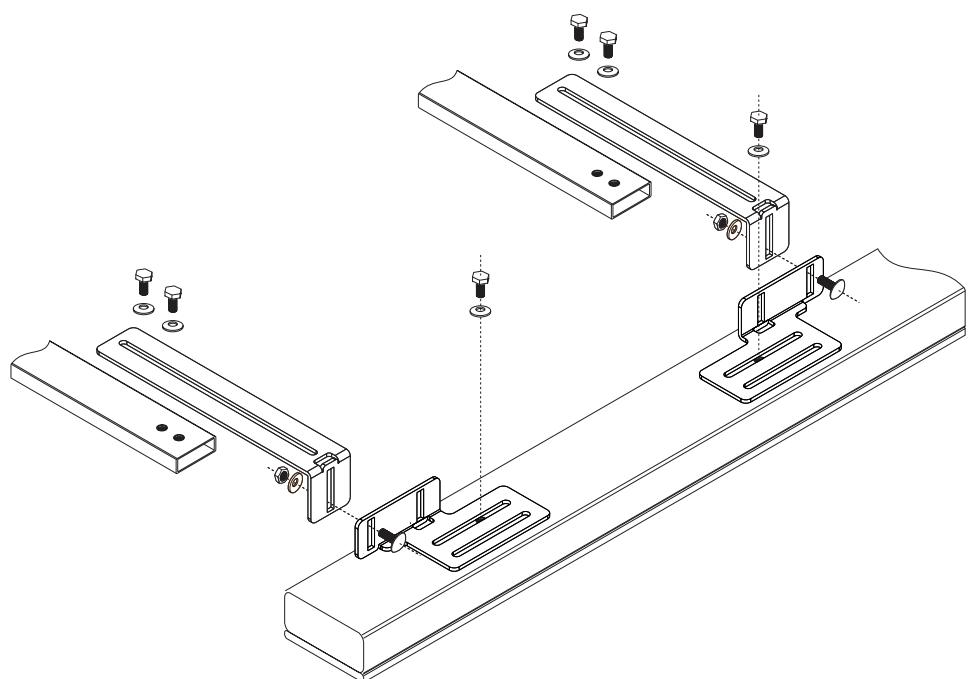

Attach the T-brackets directly to the L-brackets; position the T-brackets symmetrically, with the baseplates facing outwards.

### Variante F

For a VESA standard mounts over 600 mm.

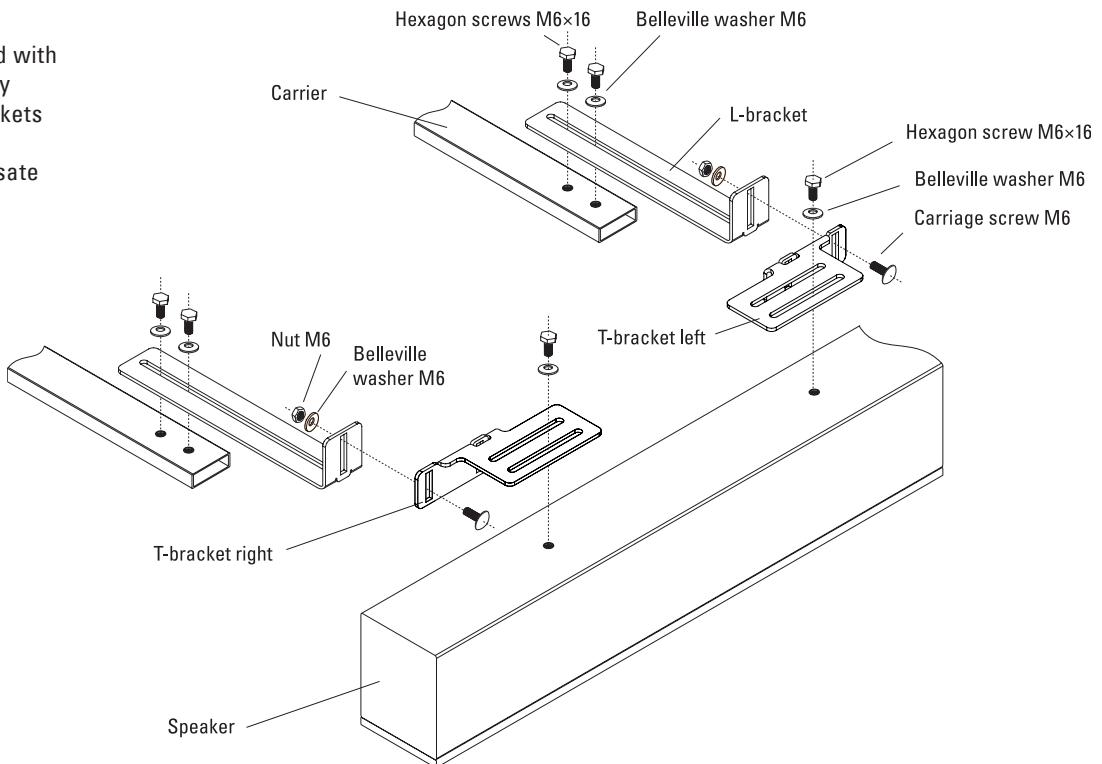

Attach the T-brackets directly to the L-brackets; position the T-brackets symmetrically with the baseplates facing inwards.

## 4.3. DL-VESA Assembly with DL-A 2.2

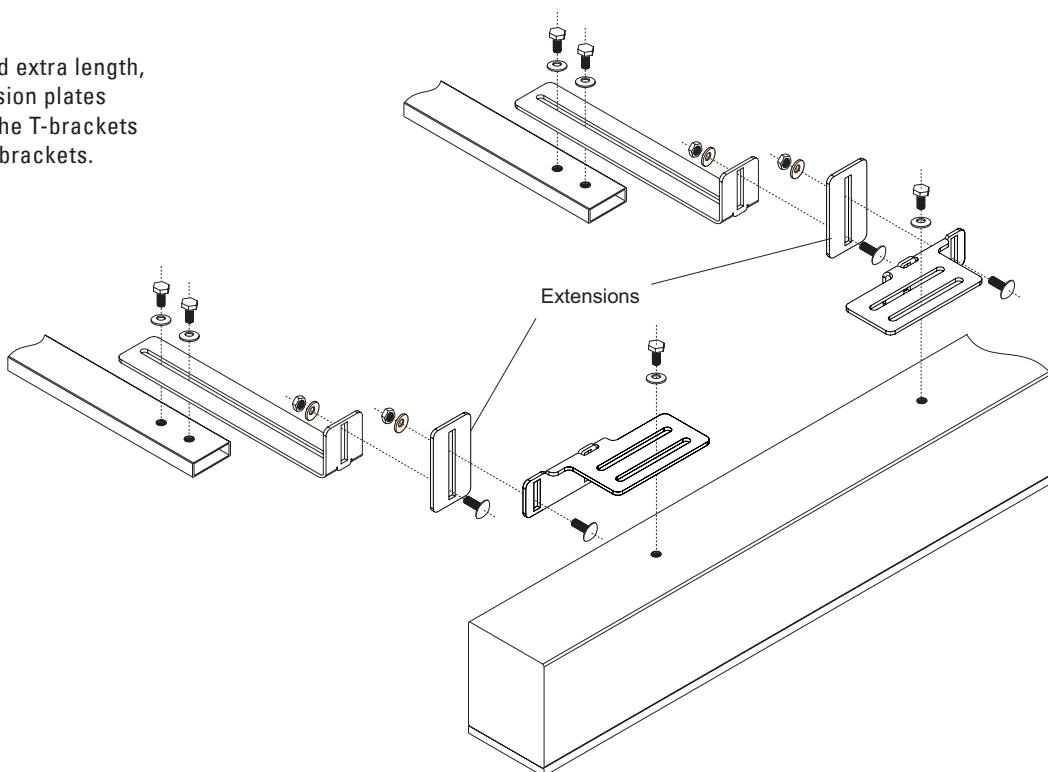

### Variante G

For flat displays used with deep DL-A 2.2 display speakers, the T-brackets are mounted facing forwards to compensate for the gap.

### Variante H

If you need extra length, use extension plates between the T-brackets and the L-brackets.

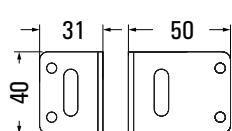

## 4.4. WH 80 Wall-Mount Technical Data

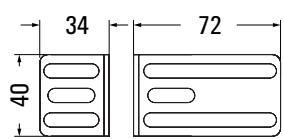

The wall mount WH 80 is adjustable for a wall distance from 35 up to 110 mm (two pairs are needed per speaker-pair).

### Dimensions

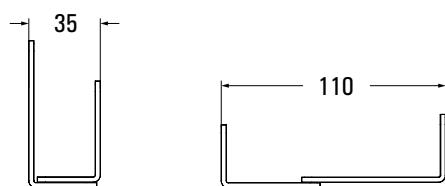

L-bracket A

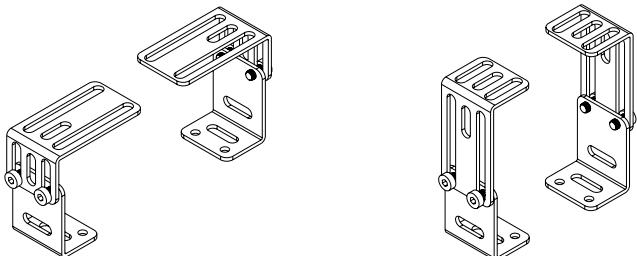

L-bracket A

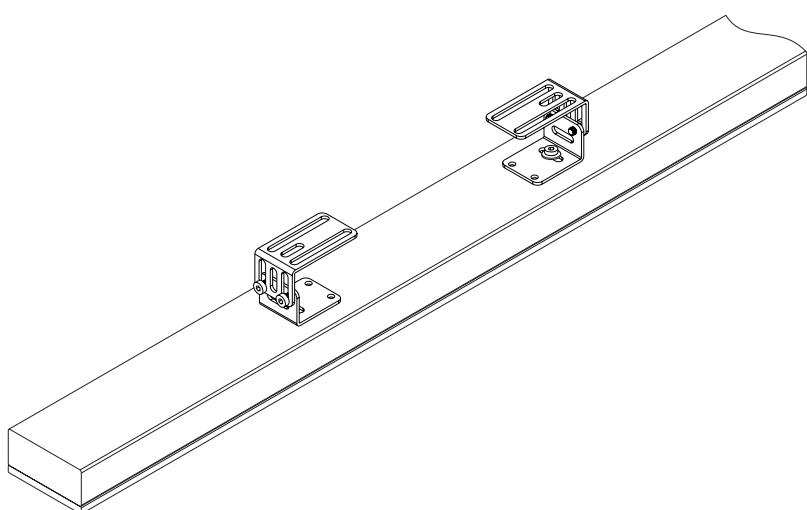

Wall-distance 35 – 110 mm

## 4.5. WH 80 Wall-Mount Assembly

The speakers can also be fixed inclined.

Fix the L-brackets A with the provided screws at the rear of the speaker (hexagon M 6 × 16 + belleville washers).

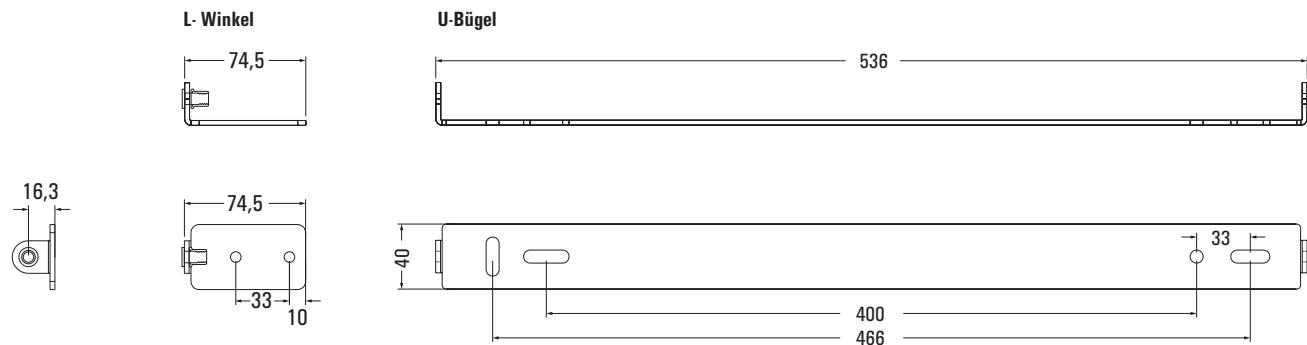

Fix the L-brackets B on the wall and connect them with the L-brackets A (hexagon M 6 × 10 + belleville washers).

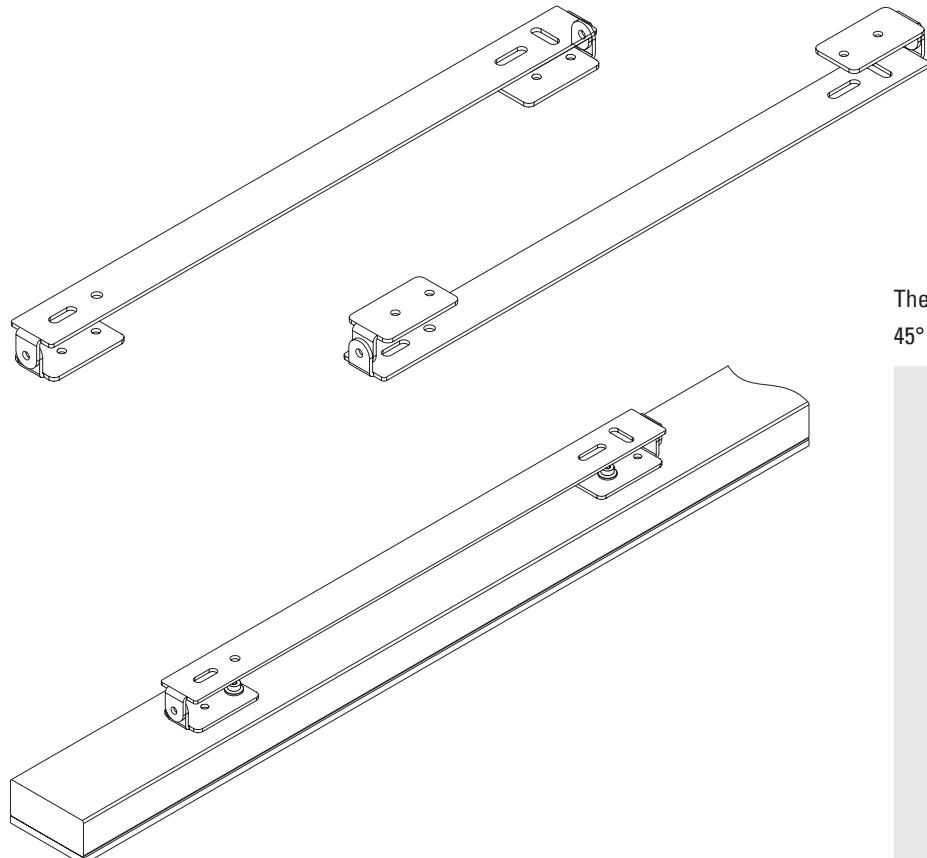

## 4.6. SH 50 Pivoting Wall-Mount Technical Data

The pivotable wall mount SH 50 has a wall distance of 33 mm and is pivotable up to 45°. (Two pieces are needed per speaker pair)

### Dimensions

## 4.7. SH 50 Pivoting Wall-Mount Assembly

The speakers can also be swivelled up to 45° as required.

Fix the L-brackets with the provided screws at the rear of the speaker (hexagon screws M 6 × 16 + belleville washers).

Fix the U-bracket on the wall and connect them with the L-brackets (hexagon screws M 6 × 10 + belleville washers).

## 5. Soundbars

### 5.1. SB-A 2.0 Active Stereo Soundbar with Integrated DSP

display series

#### Key Features

- Active stereo soundbar with DSP
- Very linear frequency range
- Optimized speech intelligibility
- 2 × 50 watts power capacity
- Automatic switch-on
- Switchable Ground-Lift
- Customized versions on measure for display widths from 960 up to 2350 mm
- VESA mounts for display heights up to 100 inches

#### Technical Data

Principle	Active stereo soundbar with DSP
Components	2 × 2.5" full-range drivers + 2 × 2.5" woofers + 4 × 2.5" passive radiators
Frequency range	55 Hz – 20 kHz
Amplifier output	2 × 50 watts
Sensitivity	max. 109 dB (1 W/1m)
Nominal dispersion	120°
Connectors	Input cinch stereo, pluggable system terminals to connect extern power supply, input cable mini jack 3.5 mm to cinch, 1.5 m
Input sensitivity	-6 dBu for full modulation, input-impedance 10 kohms
Operational controls at back	Volume control, LED On/Limit, Ground-Lift-Switch
Automatic switch-on	Switches into an idle state (SLEEP) automatically if the input signal is absent for over 5 min.
Power supply	Extern power supply 24 VDC, 40 VA
Dimensions (W × H × D)	960 × 80 × 48 mm
Weight	5 kg
Material	Cabinet aluminium, front precision steel grille, powder-coated
Fastening points	Threaded inserts 4 × M 6 at rear
Warranty	5 years

## Speaker Connection

---

See description on page 21 (SB-A 2.0)

## Starting up the Camera

---

SB-A CAM and SB-A CAM+ soundbars can be mounted above or below the display. If the bottom edge of the display is higher than 1.10 m, we recommend fitting the soundbar below the display. The camera image is aligned automatically by the integrated position sensor.

- Connect the camera to the video conference hub or PC using the USB 3.0 cable provided. The camera and microphone (CAM+ only) are automatically identified without a driver.
- If you use a different USB cable, make sure it is a USB 3.0 cable and that it is also the approved length. If you wish to use a longer cable, we recommend converting the signal.
- In the video conferencing app's software, change the settings to external camera and external microphone (CAM+ only).
- Check the volume settings in the displays and adjust if necessary.

Further settings such as "select field of view" can be made in the Huddly software (download from [www.huddly.com/app](http://www.huddly.com/app)).

### 5.3. SB-A 2.2 Active Stereo Soundbar with DSP and Integrated Subwoofers

---

**display** series

#### Key Features

- Active 2-way stereo soundbar with DSP
- Very linear frequency range
- Optimized speech intelligibility
- 2 × 50 + 2 × 100 watts power capacity
- Automatic switch-on
- Switchable Ground-Lift
- Customized versions on measure for display widths from 1200 up to 2350 mm
- VESA mounts for display size up to 100 inches

#### Technical Data

Principle	Active stereo soundbar with integrated subwoofers and DSP
Components	2 × 2.5" full-range drivers + 5 × 2.5" woofers + 5 × 2.5" passive radiators (6 × 2.5"woofers and 6 × 2.5" passiv radiators as of 1600 mm width)
Frequency range	55 Hz – 20 kHz
Amplifier output	2 × 50 + 2 × 100 watts
Sensitivity	max. 112 dB (1 W/1m)
Nominal dispersion	120°
Connectors	Input cinch stereo, pluggable system terminals to connect extern power supply, input cable mini jack 3.5 mm to cinch, 1.5 m
Input sensitivity	-6 dBu for full modulation, input-impedance 10 kohms
Operational controls at back	Volume control, LED On/Limit Grond-Lift-Switch
Automatic switch-on	Switches into an idle state (SLEEP) automatically if the input signal is absent for over 5 min.
Power supply	Extern Power supply 24 VDC, 90 VA
Mains connection	90 – 240 VAC
Dimensions (W × H × D)	1200 × 80 × 103 mm
Weight	8 kg
Material	Cabinet aluminium, front precisions steel grille, powder-coated, black
Fastening points	Threaded inserts 6 × M 6 at rear
Warranty	5 years

M 6 × 16

2 × Spacer  
20 × 20

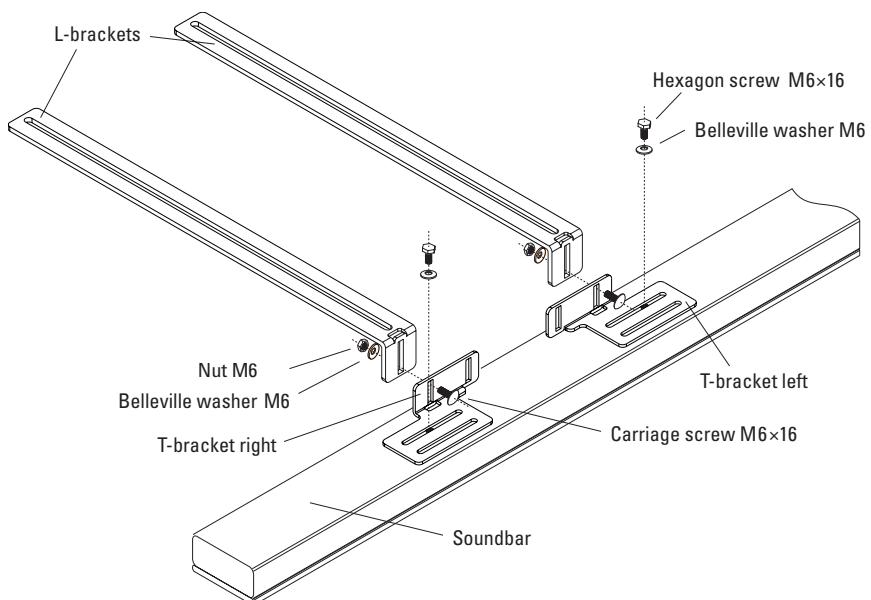

## 6.2. SB-VESA Assembly with SB-A 2.0 / SB-A 2.0 CAM (+)

### Variante A

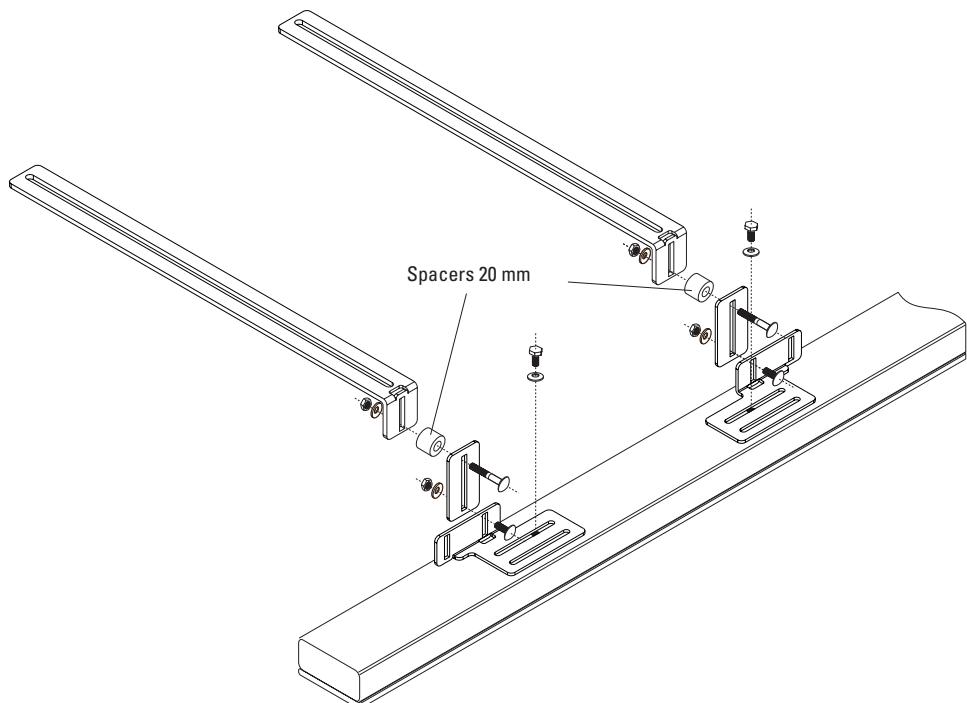

For 200–400 mm VESA standard mounts.

Attach the T-shaped brackets directly to the L-shaped brackets; position the T-brackets symmetrically, with the baseplates facing outwards. The L-shaped brackets can be attached forwards or backwards depending on the depth.

### Variante B

When the upper ends from L-brackets are coincident with the upper VESA-points from display, use the 20 mm spacers between L-brackets and T-brackets.

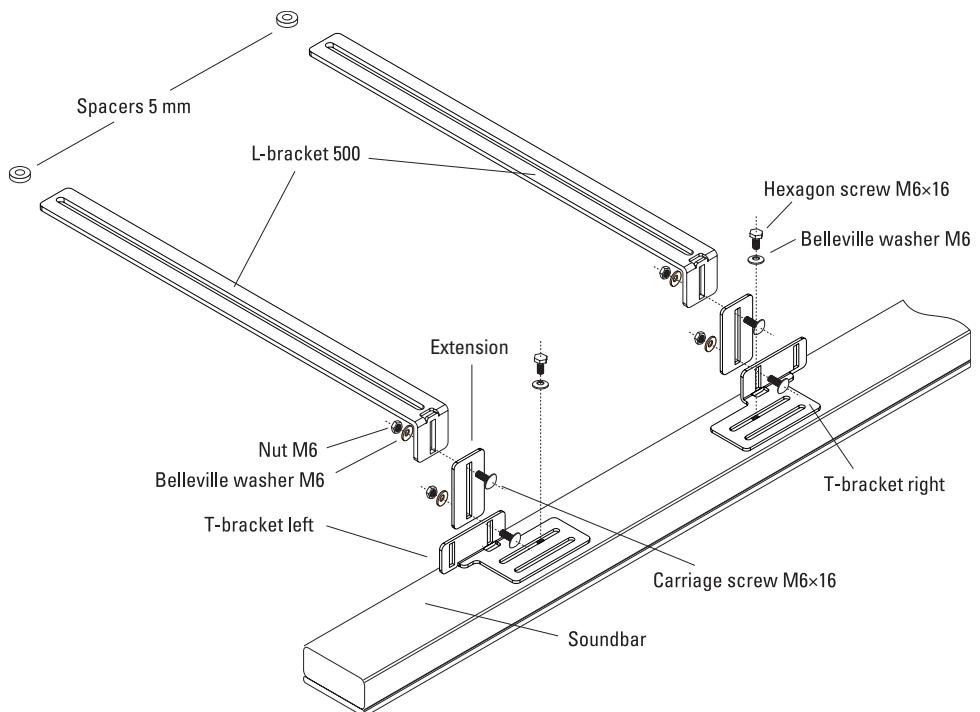

## 6.2. SB-VESA Assembly with SB-A 2.0 / SB-A 2.0 CAM (+)

### Variante C

Spacers for the upper VESA points in combination with larger displays.

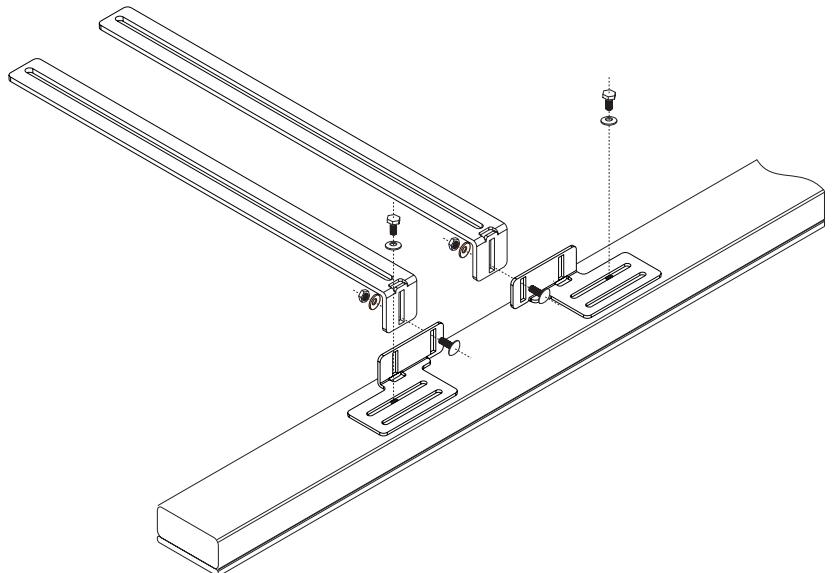

For larger displays attach the L-brackets only to the lower VESA-points.

To compensate for the gap, use the 5 mm spacers for the upper VESA-points.

### Variante D

For VESA standard mounts under 200 mm.

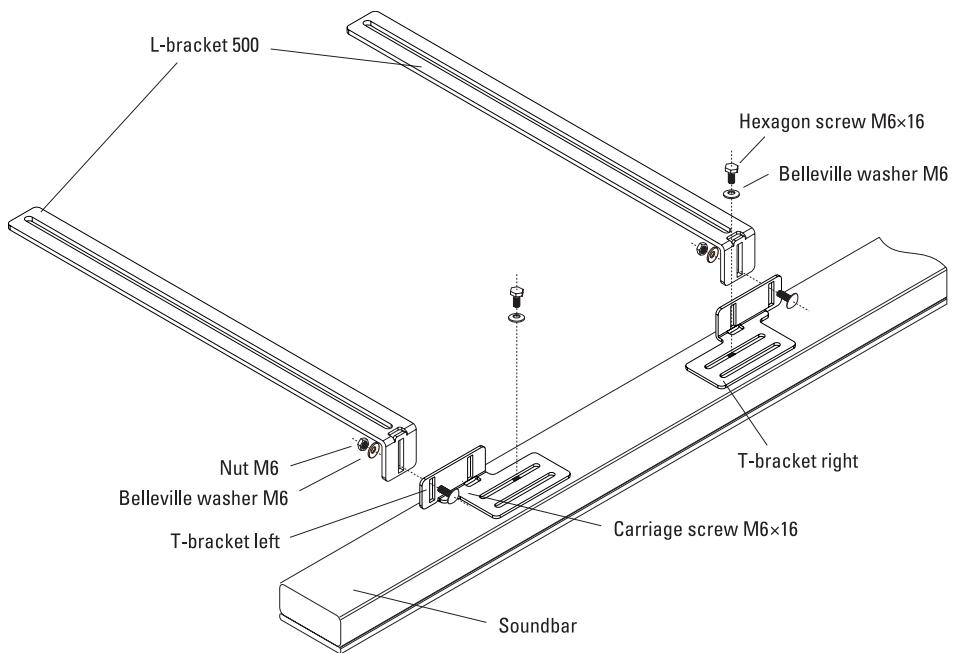

## 6.2. SB-VESA Assembly with SB-A 2.0 / SB-A 2.0 CAM (+)

---

### Variante E

For a VESA standard mounts over 600 mm.

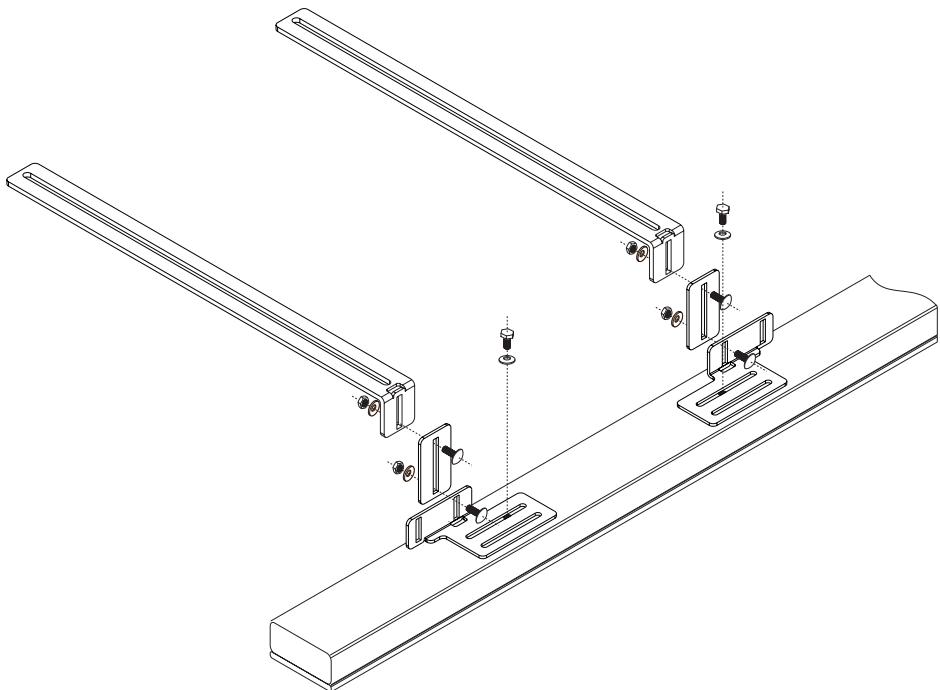

Attach the T-brackets directly to the L-brackets; position the T-brackets symmetrically with the baseplates facing inwards. The L-brackets can be attached forwards or backwards depending on the depth of the display.

### Variante F

For deep displays.

Attach the extension between T-brackets and L-brackets to compensate for the gap.

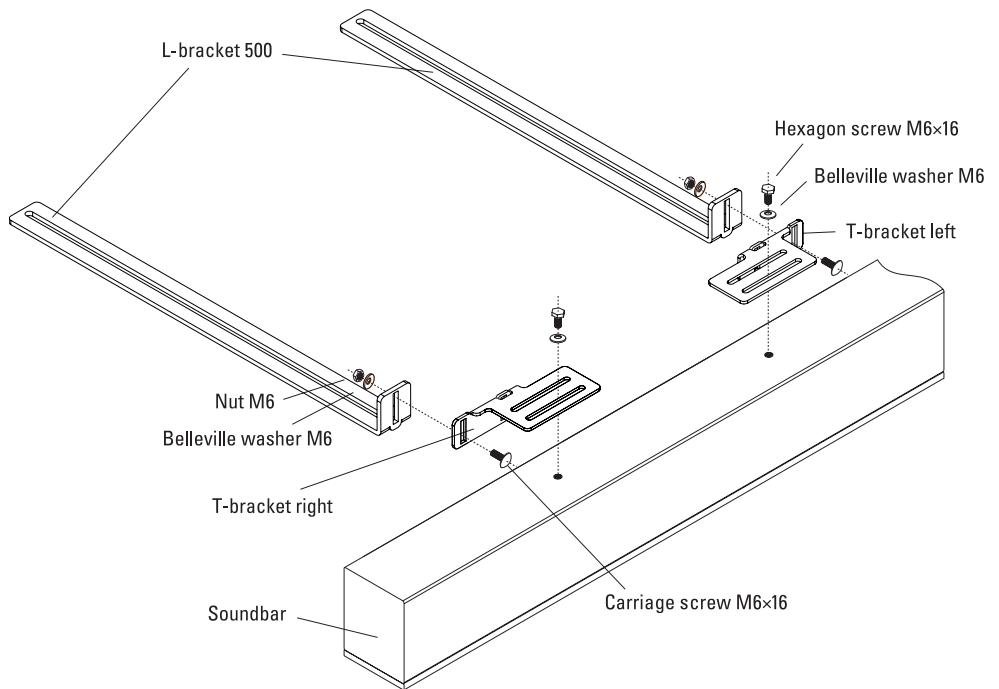

## 6.2. SB-VESA Assembly with SB-A 2.2

---

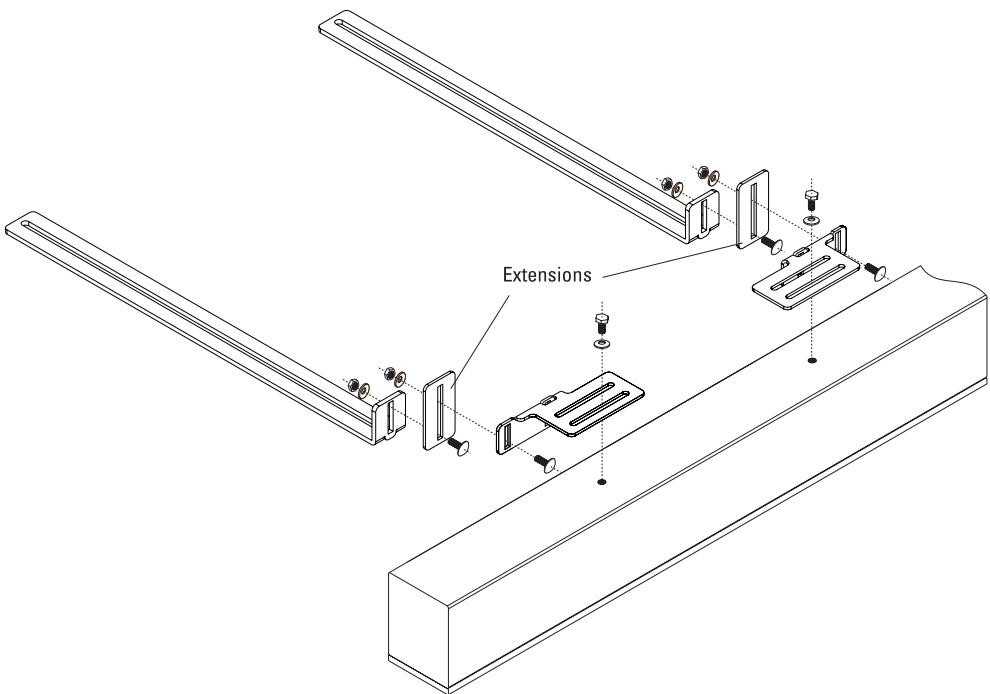

### Variante G

For flat displays used with deep SB-A 2.2 soundbars, the T-brackets are mounted facing forwards to compensate for the gap.

### Variante H

If you need extra length, use extension plates between the T-brackets and the L-brackets.

## 6.3. WH 80 Wall-Mount Technical Data

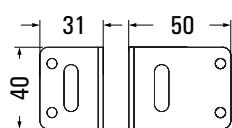

---

The wall mount WH 80 is adjustable for a wall distance from 35 up to 110 mm (one pair is needed per soundbar).

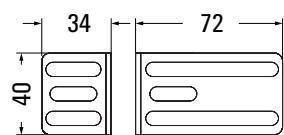

### Dimensions

---

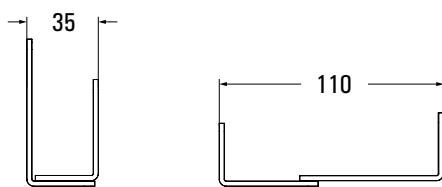

L-bracket A

L-bracket B

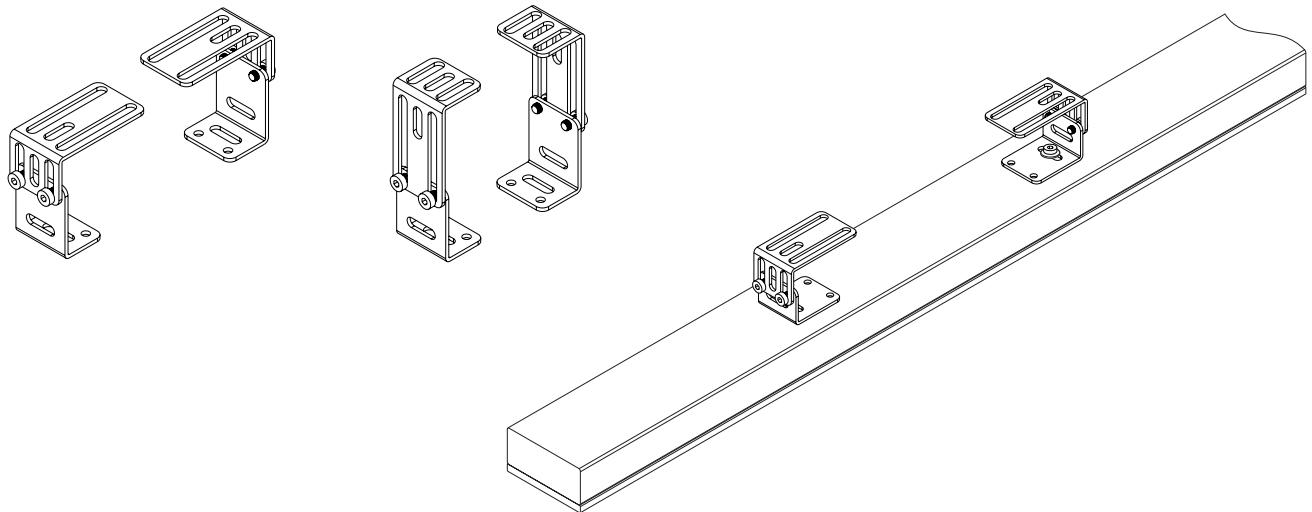

wall distance from 35 up to 110 mm

## 6.4. WH 80 Wall-Mount Assembly

---

Fix the L-brackets A with the provided screws at the rear of the speaker (hexagon screws M 6 × 16 + belleville washers).

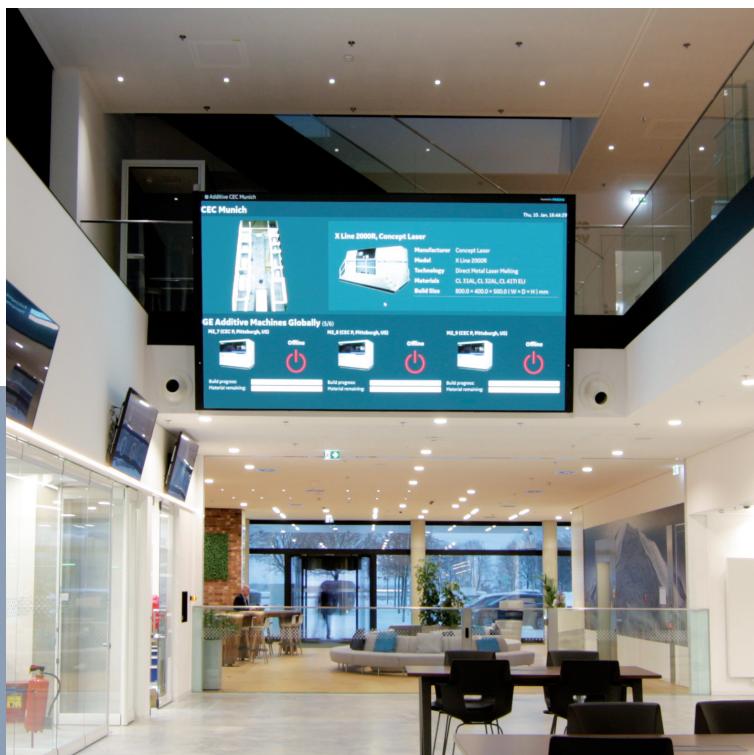

Fix the L-brackets B on the wall.

Connect the L-brackets A with the L-brackets B. (hexagon screws M 6 × 10 + belleville washers).

## 7. Model Overview

Models/ Customized Versions	Principle	Components	Frequency range	Amplifier output/ Impedance/Power RMS	Sensitivity	Dimensions	Weight	Fastening points	Connectors	Mains connection	Power supply
<b>DL-A 2.0 Standard</b>  <b>DL-A 2.0-900 DL-A 2.0-1200 DL-A 2.0-1600</b>	Active stereo speaker pair with class-D amplifier and DSP	2 × 2.5" full-range drivers + 2 × 2.5" woofers + 4 × 2.5" passive radiators	55 Hz – 20 kHz	2 × 50 W	max. 109 dB (1 W/1m)	80 × 700 × 48 mm (per speaker)  Height 600 - 900 mm Height 900 - 1200 mm Height 1200 - 1600 mm	6 kg (pair)	Threaded inserts 2 × M 6 at rear (per speaker)	Input cinch stereo incl. 1.5 m cable mini jack 3.5 mm to cinch, pluggable system terminals to passive speaker and extern power supply	90 – 240 VAC	Extern power supply 24 VDC
<b>DL-A 2.2 Standard</b>  <b>DL-A 2.2-900 DL-A 2.2-1200 DL-A 2.2-1600</b>	Active stereo speaker pair with class-D amplifier, DSP, sub-woofers	2 × 2.5" full-range drivers + 6 × 2.5" woofers + 12 × 2.5" passive radiators	42 Hz – 20 kHz	2 × 50 W + 2 × 100 W	max. 112 dB (1 W/1m)	80 × 700 × 103 mm (per speaker)  Height 600 - 900 mm Height 900 - 1200 mm Height 1200 - 1600 mm	9 kg (pair)	Threaded inserts 2 × M 6 at rear (per speaker)	Input cinch stereo incl. 1.5 m cable mini jack 3.5 mm to cinch, pluggable system terminals to passive speaker and extern power supply	90 – 240 VAC	Extern power supply 24 VDC
<b>SB-A 2.0 Standard</b>  <b>SB-A 2.0-1200 SB-A 2.0-1600 SB-A 2.0-2000 SB-A 2.0-2350</b>	Active stereo soundbar, class-D amplifier, DSP	2 × 2.5" full-range drivers + 2 × 2.5" woofers + 3 × 2.5" passive radiators (from 1200 mm 4 × 2.5" passive radiators)	55 Hz – 20 kHz	2 × 50 W	max. 109 dB (1 W/1m)	960 × 80 × 48 mm  Width 960 - 1200 mm Width 1200 - 1600 mm Width 1600 - 2000 mm Width 2000 - 2350 mm	5 kg	Threaded inserts 4 × M 6 at rear	Input cinch stereo incl. 1.5 m cable mini jack 3.5 mm to cinch, pluggable system terminals to extern power supply	90 – 240 VAC	Extern power supply 24 VDC
<b>SB-A 2.0 CAM(+) Standard</b>  <b>SB-A 2.0 CAM(+)-1200 SB-A 2.0 CAM(+)-1600 SB-A 2.0 CAM(+)-2000</b>	Active stereo soundbar, integrated camera or camera + microphone-array	2 × 2.5" full-range drivers + 2 × 2.5" woofers + 3 × 2.5" passive radiators (from 1200 mm 4 × 2.5" passive radiators)	55 Hz – 20 kHz	2 × 50 W	max. 109 dB (1 W/1m)	960 × 80 × 48 mm  Width 960 - 1200 mm Width 1200 - 1600 mm Width 1600 - 2000 mm	5 kg	Threaded inserts 4 × M 6 at rear	Camera + micro: USB 3 incl. 2 m cable, input cinch stereo incl. 1.5 m cable mini jack 3.5 mm to cinch, pluggable system terminals to extern power supply	90 – 240 VAC	Extern power supply 24 VDC
<b>SB-A 2.2 Standard</b>  <b>SB-A 2.2-1600 SB-A 2.2-2000 SB-A 2.2-2350</b>	Active stereo soundbar, class-D amplifier, DSP, sub-woofers	2 × 2.5" full-range drivers + 5 × 2.5" woofers + 5 × 2.5" passive radiators (from 1600 mm 6 × 2.5" passive radiators)	42 Hz – 20 kHz	2 × 50 W + 2 × 100 W	max. 112 dB (1 W/1m)	1200 × 80 × 103 mm  Width 1200 - 1600 mm Width 1600 - 2000 mm Width 2000 - 2350 mm	8 kg	Threaded inserts 6 × M 6 at rear	Input cinch stereo incl. 1.5 m cable mini jack 3.5 mm to cinch, pluggable system terminals to extern power supply	90 – 240 VAC	Extern power supply 24 VDC
